Attacks on women are at an all time high and even highly secured cities aren't safe anymore. But there's hope. At any such unfortunate time, your smartphone can be your best friend and protector. Loaded with security apps for women, your smartphone can help you send emergency alerts to chosen people and also let people know about your whereabouts if anything goes wrong.

Have security apps handy in your phone because safety is no longer an option, it is a necessity.

So, we made an application in consideration of Women Security. This is a simple application for use in emergency.

Firstly when you install this application there will be a registration form to register yourself and it is necessary to fill all the fields.

4G  4.1K/s (1) 8:00 AM HD 4G 87% 

 Women Security

Name

Father Name

Email ID

City

State

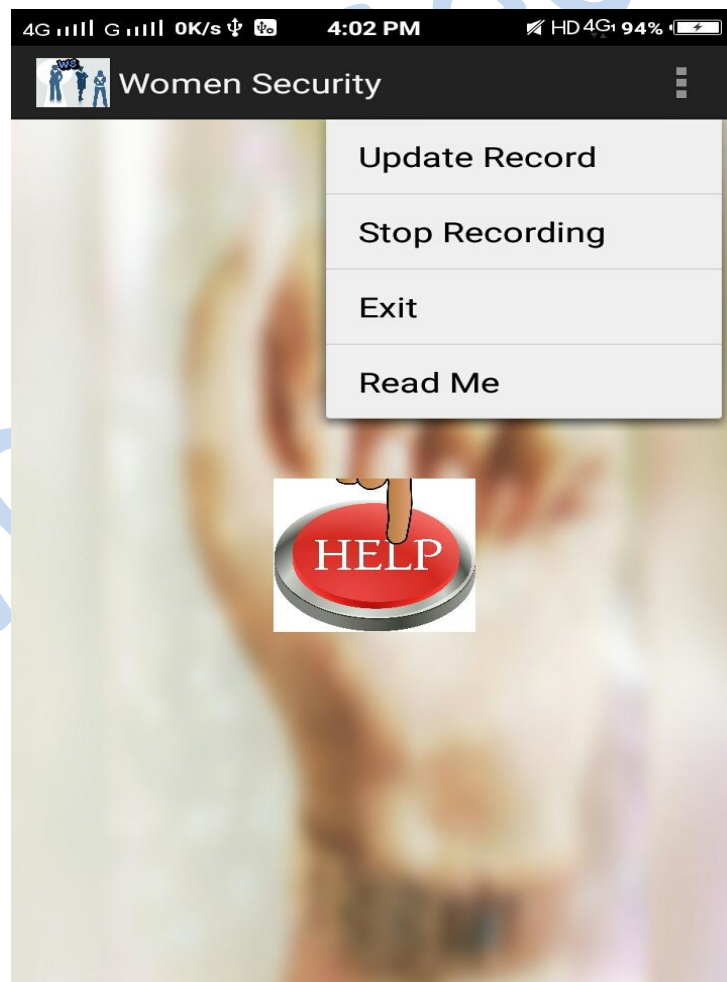

Self Mobile No

To Mobile1

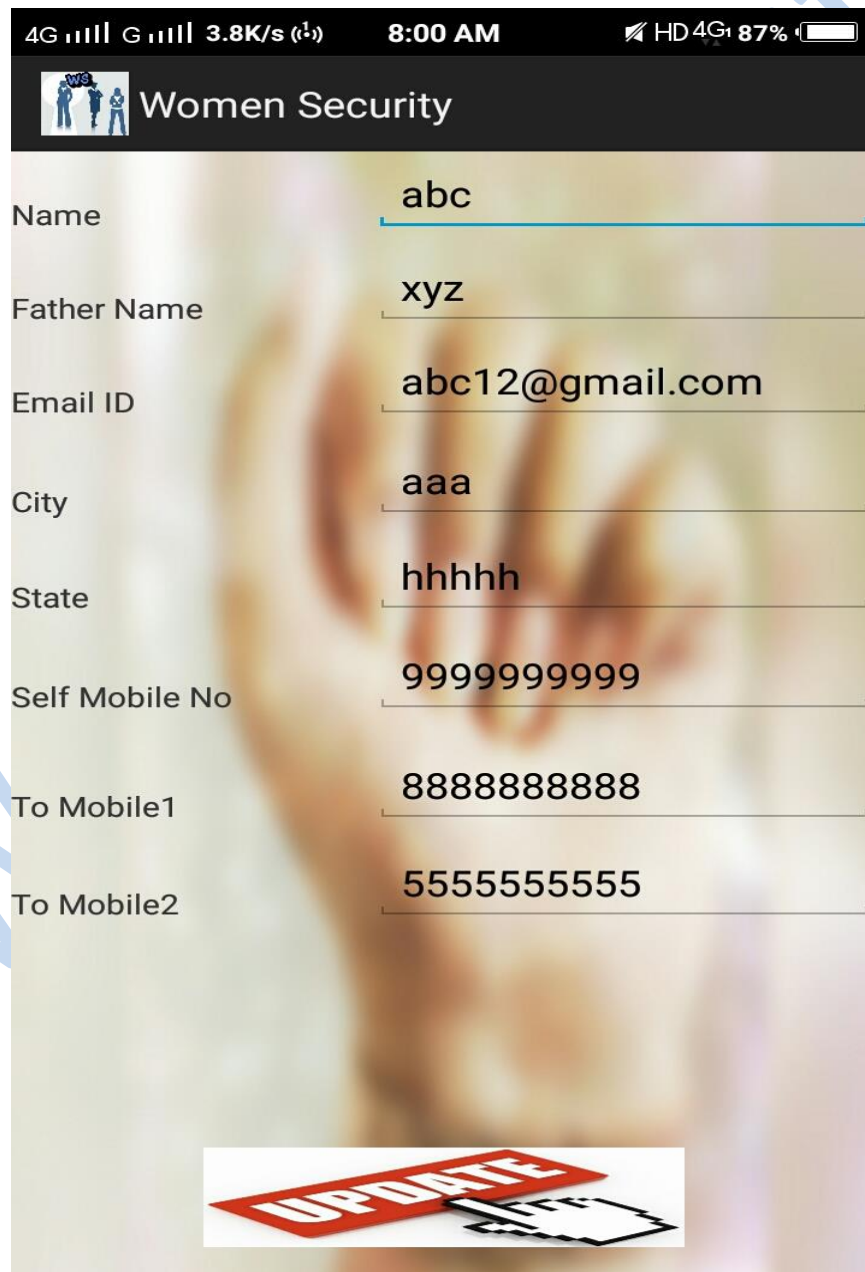

To Mobile 2

After registration you jump to home page. On home page there is a button ("HELP") given for help. When you click on button your location will be tracked and automatically sends your location to the given mobile 1 and mobile 2 in registration form and audio recording also starts in a single click. There is menu also which has items like "Stop Recording", "Update Record" and "exit". If you want to stop recording open the menu and click on stop recording (It will stop recording and email will be sent to the registered email).

If you want to make changes in your registered record click on "Update Record" in menu. You will get an update form to edit values and then click on update button. After updating you automatically come back to home page. For exit from application there is an item in menu. Click on "exit" and you will exit the application.

The screenshot shows the 'Women Security' app interface. At the top, the status bar displays '4G', signal strength, '3.8K/s', '8:00 AM', 'HD 4G', and '87%' battery. Below the status bar is a dark header with the app's logo (three stylized figures) and the text 'Women Security'. The main area contains a form with the following fields and values:

Field	Value
Name	abc
Father Name	xyz
Email ID	abc12@gmail.com
City	aaa
State	hhhhh
Self Mobile No	9999999999
To Mobile1	8888888888
To Mobile2	5555555555

At the bottom of the form is a red button with the text 'UPDATE' in white, and a small icon of a hand pointing to the button.
